Burndown chart:

A burndown chart is a graphical representation of work left to do versus time. It is often used in agile software development Methodologies such as scrum. However, burn down charts can be applied to any project containing measurable progress over time.

Sprint	Start Hours	Hours Spend Day 1	Hours Spend Day 2	Hours Spend Day 3	Hours Spend Day 4	Hours Spend Day 5	Hours Spend Day 6	Total hours
Sprint 1	12	4	2	2	2	1	1	12
Sprint 2	8	3	1	1	1	1	1	8
Sprint 3	10	3	2	2	1	1	1	10
Sprint 4	10	3	3	1	1	1	1	10
Actual remaining Hours	40	27	19	13	8	4	0	
Estimated remaining Hours	40	26	14	8	6	3	0
